***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or teach the combinations of instructions that control a SATPS receiver and verifies the validity of a SATPS three satellite solution comprising:

a first set of instructions that when executed for separates the three SATPS satellites into a first pair and a second pair;

a second set of instructions that when executed constructs a primary solution and an alternate solution, wherein the primary solution and the alternate solution satisfy the measurement constraints;

a third set of instructions that when executed computes a Doppler difference estimate for the primary solution and a Doppler difference estimate for the alternate solutions;

a fourth set of instructions that when executed computes Doppler difference residuals for the first pair and the second pair of SATPS satellites; and

a fifth set of instructions that when executed compares the Doppler difference residuals for said primary and alternate solutions to determine a valid solution.

Therefore, in light of the novel disclosure provided for by the present invention, the present claims have been deemed as patentable over prior art relating to navigation processing for a satellite positioning system receiver.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
